PROFILE

Dynamic engineering professional with 10+ years of experience spanning systems design, test engineering, and enterprise data management. I started my career in control systems design before transitioning into test and systems engineering across multiple industries. Over time, I've evolved into senior engineering roles, guiding globally distributed teams and delivering large-scale, high-impact projects. I've led hardware and software teams focused on R&D for industrial IoT and remote health monitoring solutions. Recently, my work has centered on enterprise data analytics and management.

EMPLOYMENT HISTORY

2014 — 2016

**Systems Engineer, National Instruments
Armenia**

Yerevan

- Joined NI (National Instruments) as a Systems Engineer, specializing in control systems and semiconductor testing.
- Partnered with global customers to design and architect advanced test and measurement solutions that aligned with both technical requirements and business objectives.

2016 — 2021

**Principal Program Engineering Specialist,
National Instruments Armenia**

Yerevan

- Joined Global Field Services in 2016, focusing on test system design, development, and delivery.
- Led a global initiative to create a new hardware platform for proactive condition monitoring and predictive maintenance, overseeing end-to-end hardware and software development, manufacturing, and worldwide deployment.

2021 — Present

**Principal Solutions Architect & Team Lead,
National Instruments Armenia**

Yerevan

- Principal Solutions Architect & Team Lead at NI (National Instruments), Yerevan — specializing in the design and development of enterprise data analytics solutions for engineering domains including Semiconductor and Automotive industries.
-

EDUCATION

2010 — 2014

**Electronic Engineering Technician, Yerevan
State College of Informatics**

Yerevan

Electronic Engineering, Power Electronics, control systems, HW, SW, CAD

2015 — 2019

**Bachelor of Engineering, State Engineering
University of Armenia**

Yerevan

Major: Control Systems, Electronic Engineering

2019 — 2022

**Master of Engineering, State Engineering
University of Armenia**

Yerevan

Major: Control Systems

SKILLS	Embedded HW Engineering		Embedded SW Engineering	
	CAD design Solidworks		Microcontrollers, Arduino, Raspberry Pi, Sensors	
	Mechatronics & Robotics		Condition monitoring, IoT, control systems	
	Solutions Architecting		PCB design	
	Data Management & Analysis		Machine Vision	
	LabVIEW, RT, FPGA		NI HW & SW Measurement Instruments	
LANGUAGES	Armenian	Native speaker	English	Fluent
	Russian	Fluent		
HOBBIES	Art & Engineering
